Junior Cloud Engineer

PROFESSIONAL SUMMARY

Entry-level cloud and infrastructure enthusiast with practical experience in Linux administration, networking, cloud deployment and container-based environments. Familiar with AWS core services, troubleshooting server connectivity, configuring secure access, and deploying web applications to cloud platforms.

TECHNICAL SKILLS

Cloud: AWS EC2, S3, IAM, VPC, CloudWatch | **Systems:** Linux, Bash, NFS, systemd, firewalld | **Networking:** TCP/IP, VLANs, DNS, DHCP, routing | **DevOps:** Git, Docker basics, Render, CI/CD fundamentals

EXPERIENCE

Cloud Support Intern - NimbusTech Solutions May 2026 - Jul 2026

- Assisted with provisioning and monitoring Linux-based cloud instances and troubleshooting connectivity issues.
- Reviewed IAM permissions, security group rules and service logs to support application deployments.
- Documented deployment steps and basic recovery procedures for internal development environments.

Infrastructure Project Member - Polytechnic Cloud Lab Jan 2026 - Apr 2026

- Configured Linux services including NFS, firewall rules, scheduled tasks and persistent mounts in a lab environment.
- Designed segmented network topologies and tested inter-VLAN connectivity, DHCP and access controls.

SELECTED PROJECTS

AWS Web Application Deployment - Deployed a Node.js application with environment variables, managed database connectivity and basic monitoring.

Linux File Sharing Lab - Configured NFS server/client access, exports, firewall services and persistent mounts for shared storage.

EDUCATION

Diploma in Information Technology, Republic Polytechnic - Expected 2027

Relevant modules: Linux Administration, Enterprise Networking, Cloud Computing, Software Application Development

CERTIFICATIONS

AWS Cloud Practitioner Essentials (Course) | Linux Administration Fundamentals | Cisco Networking Basics
